# NORTON GARDENS

1944

J. B. S. NORTON  
4922 Fortieth Place  
Hyattsville, Md.

*Descriptive Price list of  
daylily (Hemerocallis)*

OUR main interest is the production of new daylily (Hemerocallis) varieties, of which several hundred selections out of over 50,000 seedlings which we have grown, may be seen blooming in our garden between the last of April and frost in October. Special times to see many kinds in flower are about May 20, June 15 and July 10.

Nearly 300 varieties, new and old originated by others are also grown. Those offered in the following list have proved to be among the best for their respective colors and seasons. Many others not listed can be supplied in very limited quantity, and some of these will doubtless replace some of those in the list when they have been observed longer.

The time of flowering is given for near Washington, D. C.

Daylilies may be planted almost any time and do well under a variety of conditions. April and August are probably the best planting times.

The prices given below are for divisions shipped prepaid; they are 20% less for delivery at the garden or on orders of \$10 or more.

## Other Varieties

- Apricot* (Yeld)—May; 2 ft.; yellow. 35c
- August Pioneer* (Stout)—Aug.-Sept.; 2-3 ft.; pinkish orange. \$1.35
- Aureole* (Betscher)—May; 1-2 ft.; orange. 30c
- Badgad* (Stout)—June; 3 ft.; dark red and orange. 75c
- Bardeley* (Perry)—July; 3 ft.; orange and red 35c
- Buckeye* (Stout)—May-June; 2-3 ft.; orange with a large dark brown spot on each petal. \$3.00
- Chengtu* (Stout)—July-Aug.; 3 ft.; orange red. \$1.50
- Cinnabar* (Stout)—June-July; 2-3 ft.; yellow mixed with red. 25c
- Cressida* (Betscher)—June-July; orange yellow, abundant flowers. 35c
- Dauntless* (Stout)—July-Aug.; pale yellow orange, pastel in mid zone. 90c
- Dawn* (Perry)—July; 3 ft.; dull old rose. 35c
- Dr. Regel*—May; 1-2 ft.; orange, fragrant. 25c
- Europa* (Stout)—June-July; 3-5 ft.; rhizomate; flowers dull orange red; the common wild *H. flava*. 20c
- H. flava*—Common lemon lily; 2 different clones. May; 2 ft.; rhizomate, yellow fragrant. 20c
- Gaiety* (Betscher)—June; 2-3 ft.; light yellow \$1.50
- Golddust* (Yeld)—May; 2 ft.; yellow. 25c
- Goldeni* (Betscher)—June-July; 3 ft.; orange. 20c
- Gracilis*—May; 1-2 ft.; greenish yellow; grass-like leaves. 25c
- Gypsy* (Betscher)—July; 2-3 ft.; orange. 50c
- Imperator* (Perry)—July; 4 ft.; orange red long pointed segments. 25c
- J. A. Crawford* (Betscher)—June-July; 3-4 ft.; large yellow. 25c
- Kwanso*—July-Aug.; 3 ft.; double and later, otherwise like *Europa*. 25c
- Lemona* (Betscher)—July-Aug.; 4-5 ft.; light yellow. 35c
- Linda*—(Stout)—July-August; 2-3 ft.; sepals yellow petals duller, with a red eye. \$1.00
- Lovetts Orange* (Lovett)—June-July; 3 ft.; orange yellow. 25c
- Maculata* (Sprenger)—July; 4 ft.; large, orange red with a darker spot; rhizomate. 35c

## Varieties Originated In Our Garden

- Betty* (1938)—Early May; 2 ft; fragrant yellow flowers. \$1.00
- Elizabeth* (1941)—Early May; 2 ft.; chrome yellow, fragrant; best of early blooming. \$2.00
- Garden Lady* (1942)—June-July; 2-3 ft.; flowers open wide; the wide segments nearly salmon color with lighter edges; a rare color and beautiful form. \$5.00
- Glowing* (1937)—July; 2-3 ft.; abundant 3 in. flowers light orange with a darker spot on the petals, giving a metallic effect; very good for garden masses. 50c
- Jimmie Junior* (1943)—July; 2 ft.; flower just above the abundant straight leaves coral red with a prominent light mid-stripe in the petals, opening nearly flat, 4 inches wide. \$1.50
- Last Night* (1940)—July; 4 ft.; large, night-blooming, fragrant, light yellow flowers. \$1.00
- Louise Webster* (1940)—Early May; 2-3 ft.; similar to Betty; the tallest of the very early. \$1.00
- Melo* (1940)—June-July; 3 ft.; flowers 3-4 inches wide pale brownish yellow with a darker arch on the wide petals. \$2.50
- Mrs. Jones* (1938)—May; 1-2 ft.; flowers yellow; many of the earlier ones have 7 to 12 segments. 75c
- Mongol* (1939)—June-August; over 3 ft.; the trumpet form, chrome yellow flowers 6 to 8 inches wide, the petals nearly 2 inches wide; the largest flower in our garden. \$2.00
- Orange Rex* (1941)—June-July; 5-6 ft.; many 3-4 in. orange flowers; the tallest we have. \$1.50
- Prince William* (1940)—July; 2 ft.; the 3 inch flowers dull orange scarlet. \$1.50
- Redahd* (1942)—June-July; 3 ft.; very many flowers 3 to 6 inches wide, dull purplish red with a prominent light yellow mid-stripe in the petals; needs half shade. \$3.00
- Thyrse* (1944)—July-August; 3-4 ft.; small flowers along the main stem; bright buff, more orange in the afternoon. For lovers of the picturesque. \$2.00
- Woodridge* (1938)—June-July; 3 ft; graceful stems; flowers opening in the evening for 26 hours; sepals yellow; petals dark red brown at first, to light chocolate in the afternoon, long pointed with a slight spiral twist. \$1.00
- Many select unnamed seedlings \$1.00 each. Pick the one you like best.

- Margaret Perry* (Perry)—July-Aug.; 4 ft.; orange red; rhizome. 30c
- Mikado* (Stout)—June-July; 2-3 ft.; orange petals with a large brown spot, fragrant. Highest rating variety. 35c
- Mrs. J. R. Mann* (Betscher)—July; 2-3 ft.; yellow. \$1.00
- Mrs. W. H. Wyman* (Betscher)—July-Aug.; 3 ft.; yellow. 35c
- Modesty* (Betscher)—May-June; 3-4 ft.; light yellow. 60c
- Ochroleuca* (Sprenger)—July-Aug.; 4 ft.; very pale yellow, fragrant. 25c
- Ophir* (Farr)—July; 3 ft.; large golden yellow flowers. 40c
- Patricia* (Stout)—July; 2-3 ft.; pale yellow, fragrant; very high rating. \$1.50
- Rajah* (Stout)—June-July; 3 ft.; English red with garnet brown eye. \$1.00
- Royal* (Mead)—July; 3 ft.; yellow. 40c
- Semperflorens*—May-June; 2-3 ft.; rich yellow; best midseason. 60c
- Serenade* (Stout)—June-July; 4 ft.; very light yellow and pink pastel. \$1.35
- Sirius* (Yeld)—June-July; 2-3 ft.; orange. 50c
- Sovereign* (Yeld)—May-June; 2 ft.; yellow. 25c
- Tangerine* (Yeld)—May; 2 ft. or less; orange. 50c
- H. Thunbergi*—late lemonlily. July-Aug.; 3 ft.; light yellow, fragrant. 25c
- Vesta* (Stout)—July; 2-3 ft.; orange. 50c
- Waubun* (Stout)—June-July; 2-3 ft.; yellow with a tinge of red, petals pinched in at the tip. 50c.

About June 15 our garden of over 300 kinds of Japanese iris, grown from seed without cultivation, is expected to be in best bloom. They flowered in 1942 from May 31 to July 13. Fine for wet acid lands. Plant almost any time. Strong divisions 25, 35, and 50 cents, according to quality.

Native lilies (*L. superbum*) in many variations; bulbs to plant in early fall. 35c

When in Washington, come out and see our flowers. We are more interested in showing them than selling them.
